Chromatographia Vol. 22, No. 1–6, 1986 Contents

VOL.
22
1986

Originals

Liquid Chromatographic Separation of Metal Ions on Several Silica-Bound Chelating-Agent Stationary Phases 5
K. H. Faltynski / J. R. Jezorek

Retention Prediction of Polycyclic Aromatic Hydrocarbons in Reversed Phase Liquid Chromatography with Various Mobile Phase Compositions and Column Temperatures 13
K. Jinno / M. Kuwajima

Separation and Detection of Traces of Copper, Iron and Manganese in Cotton Materials by TLC 19
M. Kaštelan-Macan / Lj. Bokić / Š. Cerjan-Stefanović / K. Moskaliuk

An Improved HPTLC Method for the Rapid Identification and Quantification of Sulfonamides 21
G. Knupp / H. Pollmann / D. Jonas

Effect of the Eluent Composition in HPLC on the Retention of Bi- and Trifunctional Aromatic Solutes 25
E. Soczewiński / T. Dzido

The Gradient Volume Principle for Fast Evaluation of Optimum Conditions for Isocratic Analysis 31
H. Engelhardt / H. Elgass

Determination of Pyridate and its Main Metabolite CL-9673 in Plant Materials 40
M. A. Alawi

Specific Retention Behaviour of Metal (III) Tetraphenylporphyrins in Non-Aqueous, Reversed High-Performance Liquid Chromatography 43
N. Suzuki / T. Takeda / K. Saitoh

Liquid Chromatographic Capacity Factor as an Indicator of Lipophilicity in a Series of Betablocker Drugs 48
J. I. Vilá / R. Obach / R. Prieto / J. Moreno

A Variable Effluent Splitter for Simultaneous Sniffing-MS-Monitoring 51
S. Nitz / F. Drawert / U. Gellert

Factors Affecting Adsorption of Organic Solutes on Cellulose Acetate in an Aqueous Solution System 55
Y. Kiso

Gas Chromatography-Mass Spectrometry in the Study of the Adsorption of Sulfur-containing Amino Acids on Graphitized Thermal Carbon Black 59
T. B. Gavrilova / A. V. Kiselev / N. S. Kulikov / E. V. Vlasenko

A new Method to Determine Reid Vapour Pressure for Stabilized Crude Oils by Gas Chromatography 63
W. K. Al-Thamir

Some Improvements in the Determination of Volatile Nitrosamines by Fused Silica Capillary-GC in Combination with a Thermal Energy Analyzer 65
H. Borwitzky

Relationship Between Retention and Molecular Structure of Pyrimidine Bases 73
Yu. A. Eltekov / Yu. V. Kazakevitch

Equilibrium Between α- and β-Isomers of Dihydroartemisinine and its Multiple-Peaks in High-Performance Liquid Chromatography 77
Zhao Shishan

A Limit to Alternate Column Recycle Chromatography 81
Sj. van der Wal

Ligand Exchange Separation of Metal Ions on Tetracycline Hydrochloride Sorbed on Alumina 88
D. K. Singh / A. Darbari

Refractive Index Detection in Microbore Column Liquid Chromatography 91
C. Fujimoto / T. Morita / K. Jinno

The Use of Carbon Monoxide and Water Gas as the Flame-Forming Agent in the Thermionic Detector 95
V. G. Berezkin / T. G. Andronikashvili / G. V. Tsitsishvili / Z. A. Gvelesiani

Nucleotide Pools and Energy Charges of Smooth Molluscan Muscles Analysed by Reversed-Phase, Ion-Pair, High-Performance Liquid Chromatography 99
A. Gies

Liquid Chromatographic Retention of Homologous Alkanes in the two States of C18-Bonded Reversed Phase Silicas 103
D. Morel / J. Serpinet / J. M. Letoffe / P. Claudy

Chromatographia Vol. 22, No. 1–6, 1986 Contents

TLC Separations of Some Metals Ions with Aqueous and Aqueous – Organic Solvent Systems Containing Formic Acid 109
A. Mohammad / N. Fatima

Investigation of Capillary Micro-Packed Columns Composed of two Segments Packed With a Sorbent of Different Particle Size 117
A. Malik / V. G. Berezkin / V. S. Gavrichev

The Role of the Theoretical Plate Concept and Gamma Density Functions in Studies on Mass Transport and Mass Loadability of Chromatographic Columns 123
H. C. Smit / J. C. Smit / E. D. de Jager

High-Performance Liquid Chromatographic Separation of Hematoporphyrin and its Nickel, Copper and Zinc Complexes on Octadecyl-Bonded Stationary Phase 132
N. Suzuki / K. Saitoh / Y. Sugiyama

A High-Performance Liquid Chromatographic Method for the Measurement of Amiodarone and its Main Metabolite (Desethylamiodarone) in Plasma Samples from Patients Treated with *Cordarex*® 135
F. Susanto / S. Humfeld / H. Reinauer

Trace Analysis of Selected Benzidine and Diaminodiphenylmethane Derivates in Urine by Means of Liquid Chromatography Using Precolumn Sample Preconcentration, UV and Electrochemical Detection 138
P. Trippel-Schulte / J. Zeiske / A. Kettrup

Investigation of the Interaction of Olefin-Bonded Transition Metal Complexes by Gas Chromatography. II. Phosphine Complexes of Cu(II) 147
W. Wasiak

HPLC Separation of Isomers of Tetrahydro-1,5-Benzothiazepines and Tetrahydro-1,5-Benzodiazepines 153
J. H. Liang / Z. Y. Liang / G. Yan / J. Sheng

Analysis of Flavonol Aglycones in Wine Extracts by High Performance Liquid Chromatography 157
E. Revilla / E. Alonso / M. I. Estrella

Non-Aqueous, Reversed-Phase, High-Performance, Thin-Layer Chromatography and Column Liquid Chromatography of Metal Complexes of Porphine 160
Y. Wakui / K. Saitoh / N. Suzuki

High-Performance Liquid Chromatography Separation of Chlordecone and its Metabolites 165
S. E. George / L. C. King / L. D. Claxton

Zone Formation in Ion-Pair RPLC
I. Effects of Adsorption of Organic Ions on Established Column Equilibria 168
A. Sokolowski

Zone Formation in Ion-Pair RPLC
II. System Peak Retention and Effects of Desorption of Organic Ions on Established Column Equilibria 177
A. Sokolowski

Estimation of C_2-C_5 Hydrocarbons in Air by Pre-Concentration on Silica Gel at Dry Ice Temperature 183
A. J. Netravalkar / A. M. Mohan Rao

Determination of Ten Anti-inflammatory Drugs in Serum by Isocratic Liquid Chromatography 187
C. I. Omile / I. R. Tebbett / B. Danesh

HPLC Determination of Carotenoids in Human Serum by Gradient Elution Technique 189
R. Ohmacht / Gy. Tóth / G. Voigt

Remarks on the Detection of Phenols in Airborne Particulate Matter 191
R. Tomingas / W. Mönch / U. Matthiesen

Matrix Effect on the Retention in Reversed-Phase Liquid Chromatography 194
H. Wada

The Use of ATR-IR to Identify the Components Separated by Paper Chromatography 199
K. Sreenivasan

The Preparation of Immobilized Polysiloxane Coated on Packings Materials for High-Pressure Gas Chromatography 201
R. T. Ghijsen / F. Nooitgedacht / H. Poppe

Polyacrylate Liquid Crystalline Stationary Phases in Supercritical Fluid Chromatography with Carbon Dioxide Mobile Phase 209
S. Rokushika / P. Naikwadi / A. L. Jadhav / H. Hatano

Effect of Solvent Composition on Free Release Static Coating of Capillary Columns 213
B. Xu / N. P. E. Vermeulen / J. A. M. Smit

VOL
22
198

Chromatographia Vol. 22, No. 7–12, 1986 Contents

Originals

Crocheted PTFE Reactors for Post-Column Photochemistry in HPLC 231
J. R. Poulsen / K. S. Birks / M. S. Gandelman / J. W. Birks

On-Line Post-Column Extraction in Column Liquid Chromatography with Electron-Capture Detection Part I: Design and Analytical Characteristics 235
F. A. Maris / M. Nijenhuis / R. W. Frei / G. J. De Jong / U. A. Th. Brinkman

The Influence of the Pre-Treatment of Glass Capillary Columns on the Properties of n-Octadecanol Films Used as a Stationary Phase 241
K. Surowiec / J. Rayss / W. Buda / A. Waksmundzki

A Fast Multiparametric Least-Squares Adjustment of GC Data 245
M. Maeck / A. Y. Badjah Hadj Ahmed / A. Touabet / B. Y. Meklati

Separation of Ribosomal Protein-Protein Crosslinks from *Bacillus stearothermophilus* and Ribosomal Proteins from Archaebacteria by High Performance Liquid Chromatography 249
Roza Maria Kamp / J. Brockmöller / Brigitte Wittmann-Liebold

Stepwise Elution Paper Chromatography Analysis of Fractions of Thermically Dispersed Maize, Wheat and Sorghum Starch 255
M. Čeh / Č. Stropnik / S. Leskovar

Model for Partition Chromatography of Ionic Solutes in the Presence of Eluent Electrolytes 261
M. Shibukawa / N. Ohta

HPLC Separation of Flavonol Glycosides in Wines 268
E. Alonso / M. I. Estrella / E. Revilla

Gas Chromatographic Separation of C_6 Epoxides on OV-101 Glass Capillary Column; Pre-Calculation of the Retention Index 271
S. Boneva / N. Dimov

Separation of Metal Ions Using In-situ Complexation Chromatography with Ethyl Xanthate and 1,10 Phenanthroline as Ligands 275
G. G. Wallace / G. Heneghan

Chromatographic Resolution on Mixed Stationary Phases; the Choice of the Optimum Composition 278
W. Czelakowski / P. Kusz / A. Andrysiak

Reversed Phase Liquid Chromatographic Assay of FLA 908, a Metabolite of Remoxipride, in Hydrolised Urine by Means of a Peak Compression Effect 283
L. B. Nilsson / M. Widman / B. Bryske / D. Westerlund

Isolation of Standard-, Deoxy- and Highly Phosphorylated Nucleotides from *Bacillus brevis* and their Separation by Ion-Pair High-Performance Liquid Chromatography 287
H. Federn / H. Ristow

Interference of Chloride in the Speciation of Arsenic by Ion Chromatography 292
G. K.-C. Low / G. E. Batley / S. J. Buchanan

Evaluation of Various Bonded-Phase Materials for the Off-line Clean-up Procedure of Urinary 5-Hydroxyindolacetic Acid Prior to Its Determination by HPLC 299
B. Buszewski / K. Šebeková / P. Božek / L. Štibrányi / J. Jendrichovský / I. Novák / D. Berek

Rapid Quantitative Analysis of Morphine in Blood by Flash-Heater Methylation and Gas Chromatography with a Nitrogen-Specific Detector 303
C. Kim

Gradient Thin-Layer Chromatography of Coumarins and Furocoumarins 307
K. Glowniak / G. Matysik / M. Bieganowska / E. Soczewiński

Comparison of Injection-Generated Gradient and Isocratic Ion-Pair Chromatography on Short Microbore Column in HPLC 311
M. Krejči / K. Šlais / A. Kunath

A Gradient Valve for HPLC 316
M. Minárik

Diffusion Inside Particles in HPLC Columns 319
J. P. Crombeen / H. Poppe / J. C. Kraak

Gas Chromatographic Analysis of C_1–C_{22} Carboxylic Acids Esterified in Aqueous Solutions as n-Propyl Esters 329
I. Molnár-Perl / M. Morvai

Sampling in Capillary Gas Chromatography: A Comparison between the Split and the PTV-Split Procedures 333
G. Reglero / M. Herraiz / M. D. Cabezudo

Effect of Surface Energetic Heterogeneity in Liquid Adsorption Chromatography with Mixed Mobile Phases: Deviations from Soczewinski's Relationship 337
W. Rudziński / J. Michalek / J. Å. Jönsson

VOL. 22 1986

Chromatographia Vol. 22, No. 7–12, 1986 Contents

Elution Characteristics of Polymeric Solutes and Inorganic Salts in HPLC on a Cellulose Acetate Column 341
Y. Kiso / T. Kitao

HPLC Analysis of Phenylthiocarbamyl (PTC) Amino Acids.
I. Evaluation and Optimization of the Procedure 345
P. S. L. Janssen / J. W. van Nispen / P. A. T. A. Melgers / H. W. M. van den Bogaart / R. L. A. Hamelinck / B. C. Goverde

HPLC Analysis of Phenylthiocarbamyl (PTC) Amino Acids.
II. Application in the Analysis of (Poly)peptides 351
P. S. L. Janssen / J. W. van Nispen / P. A. T. A. Melgers / H. W. M. van den Bogaart / G. W. M. van Aalst / B. C. Goverde

Mixed Micropacked Columns Designed for Selective Separation of Fermentation Products 358
G. Reglero / T. Herraiz / M. Herraiz / M. D. Cabezudo

Isomer Specific Determination of Polychlorinated Biphenyls in Animal Tissues by Gas Chromatography Mass Spectrometry 363
W. A. Heidmann

Würzburg Chromatography Workshop
HPLC / FPLC in Research and Industry

Editorial 372
F. Lottspeich / H.-J. Schneider / M. Uihlein / U. Klotz

Lectures

Validierung und Kalibrierung in der HPLC 373
S. Ebel

Non-Porous Microparticulate Supports in High-Performance Liquid Chromatography (HPLC) of Biopolymers – Concepts, Realization and Prospects 379
K. K. Unger / G. Jilge / R. Janzen / H. Giesche / J. N. Kinkel

New Automated Amino Acid Analysis by HPLC Precolumns Derivatization with Fluorenylmethyl-oxycarbonylchloride 381
I. Betnér / P. Földi

Optimal Conditions for Size Exclusion Chromatography of Proteins 388
H. Engelhardt / U. M. Schön

Possibilities and Limitations of Hydrophobic Interaction Chromatography Evaluation with Strepavidin 391
E. Reh / C. Birkner / M. P. Weigert

Molecular Weight Distribution in the Ultrafiltrates of Different Filters Used for Continuous Arteriovenous Hemofiltration 399
H. Brunner / U. Schäfer / H. Mann / S. Stiller / H.-G. Sieberth

A Rapid Purification Procedure for S-Adenosyl-L-Methionine: Catechol O-Methyltransferase by High-Performance Ion Exchange Chromatography and Subsequent Affinity Chromatography 404
J. Veser / W. May

High-Performance Liquid Chromatography in Protein Chemistry 407
F. Lottspeich

Therapeutisches Serum-Spiegel-Monitoring des Theophyllins unter Verwendung einer spezifischen HPLC-Analytik 411
H.-U. Schulz / I. Trotnow / E. Kraas / H. Hollandt

Analysis of Cardiovascular Eicosanoids in Man with Special Reference to HPLC 416
S. Fischer

Studies on the Metabolism of Oral Anticoagulants 421
J. X. de Vries

Hydrophilic Silica-Based Anion Exchanger with Adjustable Capacity for HPLC of Nucleotides 425
H. Engelhardt / E. Schweinheim

Posters

Quantitative Bestimmung organischer Säuren in Plasma und Urin mit Hilfe der Ion-Exchange-HPLC 430
L. B. Zimmerhackl / M. Kramer / S. Blum / P. Küster / P. Rausch / K. Steidel / M. Brandis

Column Switching in HPLC – Determination of Drug Substances in Biological Material 431
P. J. Arnold / R. Guserle / Michaela Woerz / V. Luckow

Separation of 30S Ribosomal Proteins from Sulfolobus acidocaldarius by Ion Exchange and Gel Permeation Chromatography 432
J. R. Grün / R.-M. Kamp / R. Reinhardt

Dynaseal-Connection System for HPLC 433
A. Sonnenschein / H. Knauer

Qualification and Validation of HPLC Systems (Methods) with CR3A Integrator. A Basic Program for Direct Calculation of Important Chromatographic Data 434
Th. Crispin / R. Wirtz

Vollautomatische HPLAC-HPLC Catecholamin-Analyse im Urin 437
B. Wilmers / K.-S. Boos / R. Sauerbrey / E. Schlimme
